

CH-025 - Heating resistor

Spare Part Number: CH-025

Net Weight: 0.00kg

Net Dimensions: 1,046.00mm x 8.00mm x
12.00mm

Description

CH-025 Heating resistor quartz (no longer in use)

Replaced by CH-810

Quartz heating is a type of radiant heating, commonly referred to as short-wave infrared heating. The tubes are manufactured from quartz glass (fused silica), which protect and support the heating coils. They provide efficient transmission of infra-red radiation, good resistance to chemical and contamination.

Heating coils are wound in various grades of iron-chrome-aluminium alloys to match the applications and operating conditions, and typically generate radiant emission in the short to medium wavelength range.

300W - 8x12x???mm 230V

Equipment Reference

810 for Hot Roll (Made in Italy)
