

## CH-006 - Heating resistor

**Spare Part Number:** CH-006

**Net Weight:** 0.00kg

**Net Dimensions:** 1,046.00mm x 8.00mm x 12.00mm

### Description

## CH-006 Heating resistor quartz

Quartz heating is a type of radiant heating, commonly referred to as short-wave infrared heating. The tubes are manufactured from quartz glass (fused silica), which protect and support the heating coils. They provide efficient transmission of infra-red radiation, good resistance to chemical and contamination.

Heating coils are wound in various grades of iron-chrome-aluminium alloys to match the applications and operating conditions, and typically generate radiant emission in the short to medium wavelength range.

1300W - 8x12x1046mm 230V
