

AH-055 - Hinge

Product Code: AH-055
Weight: 0.00kg
Dimensions: 0.00cm x 0.00cm x 0.00cm

Description

AH-055 Hinge

A hinge is a machine element that connects two bodies allowing angular movement about a fixed axis of rotation, all the while preventing translations and rotations on the remaining two axes. A hinge can be considered as a journal bearing with only one degree of freedom where a shaft is rotating in a hole. Hinges only allow one rotation, either yawing (the most common), pitching, or rolling.
