

CE-026 - Servo Motor

Product Code: CE-026

Weight: 0.00kg

Dimensions: 0.00cm x 0.00cm x 0.00cm

Description

CE-026 Servo Motor (Fixing holes to be prepared in the factory)

Servo motors or “servos”, as they are known, are motors paired with a position encoder that provide position and speed feedback with high precision. They are controlled by a Servo drive which monitors the feedback from the servo motor and automatically adjusts its output to correct for differences between the commanded value and actual.

Note: Fixing holes to be prepared in the factory.
